Course Comments: BIM 102
Fall 2007
S. Yamada

- Having more example problems in lecture would be helpful on how to apply concepts that were explained.
- Strength: Class was interesting and fun. Weakness: Homeworks and tests were too difficult.
- Teacher likes to pick on one student, only one. Sometimes another student but mostly one. I want homework points back. More examples in class. Don't play mind games on tests, otherwise I enjoyed the class.
- The grading for this course is very harsh, very different from other classes.
- Do more examples in class. Throughout the quarter you only did examples in 1 or 2 lectures.
- Professor was very helpful in office hours.
